

Sensor cable 6x0.3

Sensor cable 6x0.3

It can be used as data transmission cable, control and connecting cable predominantly for transmission of analog and digital signals in process controlled facilities in control technology.

These cables are widely used in electronic devices, computers, communication equipment, load cells and scales and other high-tech products, such as aviation, military, and other fields.

Main Structure

Conductor	material	tinned copper
	stream	16
	diameter(mm)	0.15
	core	6
Insulating layer	material	PE
	diameter(mm)	1.4
	color	red, green, black, white, blue, yellow
	core order	no speical order
Shield layer	wrap I	
	material	aluminum foil
	cover rate	100%
	wrap II	
	material	PET
	cover rate	100%
shiled wire	material	cooper wire
	structure	5*0.115
Earth wire	material	/
	structure	/
Cover layer	material	PVC
	structure	7.0±0.1
	color	black
Behavior of electricity	working temperature (°C)	(-20~+70)°C
	voltage withstand test	voltage 1Kv, 1min no break down
	rated voltage V	300V/500V
	coductor DC resistance Ω/km	<69
	Insulation resistance MΩ/km	≥1000

Suitable for: All models of load cells
All indicators
All junction boxes
